

RESOLUTION _____

ENTITLED: “A RESOLUTION CERTIFYING THAT THE GOVERNING BODY OF THE CITY OF CHEYENNE HAS AGREED ON THE TOWN OF BURNS SUBSTITUTION PROJECT TO BE SUBMITTED TO THE STATE LOAN AND INVESTMENT BOARD FOR THE 2011-2012 COUNTYWIDE CONSENSUS BLOCK GRANT FUNDING.”

Whereas, the Governing Bodies of Laramie County and the City of Cheyenne desire to participate in the State Loan and Investment Board’s Chapter 32 Countywide Consensus Block Grant program; and

Whereas, the rules of the State Loan and Investment Board require that application for funds under this program be made by the Board of County Commissioners and agreed to by municipalities representing at least 70% of the county’s incorporated population; and

Whereas, the Governing Body for Laramie County and Cheyenne represent greater than 70% of the incorporated population of Laramie County;

THEREFORE, BE IT RESOLVED BY THE GOVERNING BODY OF THE CITY OF CHEYENNE, WYOMING

That the City of Cheyenne support an application from the town of Burns in the amount of \$23,299.86, through Laramie County, to the State Loan and Investment Board for the project set forth in the 2011-2012 Countywide Consensus Block Grant Application Form; and

PRESENTED, READ AND ADOPTED THIS 12TH DAY OF NOVEMBER, 2012.

Richard L. Kaysen, Mayor

ATTEST:

_____.
Carol Intlekofer, City Clerk

Town of Burns
PO Box 66
Burns, WY 82053
307-547-2206

October 9, 2012

Office of State Lands and Investments
Herschler Building, 3rd West
122 West 25th St.
Cheyenne, WY 82002

To Whom It May Concern:

The Town Council and I are very supportive of the request to allow transference of the unspent \$23,299.86 remaining under grant number MRG-11232 to our new request which will allow the Town of Burns to replace an outdated but needed monitoring system which covers our water and sewer functions, including monitoring of sewer flow, lift station operation, flume output, well function, water storage tower levels, and chlorine analysis.

This replacement has been strongly urged by the engineering firm with which the Town works, and was forwarded to the Council for action by our Utility Board.

Thank you for your consideration.

Judith Johnstone, Mayor
Town of Burns

OFFICE OF STATE LANDS AND INVESTMENTS

Instructions to complete the Application Summary Form for Governmental Entity Grant and/or Loan assistance.

An application Summary Form is to be completed and accompany each application when applying for funding from one or more of the following programs:

Federal Mineral Royalty Capital Construction Account Grants (MRG)

Wyoming Joint Powers Act Loans (JPA)

The Office of State Lands and Investments will reproduce and provide the completed Summary Form to the State Loan and Investment Board as the applicant's summary of the request for funding. The applicant should view this form as its opportunity to inform the Board of the need for the project and reason the applicant feels the state should help in financing the project. There is no limit on the length of the Application Summary Form, please attach additional forms if needed. However, the Office suggests a bulleted format and the applicant should bear in mind the time constraints of the State Loan and Investment Board.

The narrative provided in the form should include at a minimum the following information:

- . The type of entity the applicant is (city, county, water and sewer district, etc.).
- . The approximate population of the applicant that the project will serve directly and indirectly.
- . A brief description of the project and why the applicant needs the project.
- . The requested amount from each funding source requested by the applicant and the percentage of the total project cost requested from each funding source.
- . The applicant must also describe the source and the status of all matching funds.
- . The applicant must provide an estimated project schedule that addresses planning, design and construction of the project.
- . If the applicant submits multiple applications for consideration at one meeting, the applicant must provide its priority ranking of those applications.
- . If the applicant needs the project to meet a federal or state health and/or a safety requirement the applicant must provide the specific health or safety requirements the project will address.
- . If applying for a loan the applicant must list all sources of proposed security for the loan.

For special districts, the following information is also required:

- . The geographical area the special district covers and the date when the County Commissioners formed the district.
- . If the applicant is water and sewer district or an improvement and service district, the narrative must include the number and type of lots the project will serve initially and the total number of lots in the district, and the current zoning of the district. For example, is the district zoned for residential use only or for commercial use or for a combination of uses?

Office of State Lands and Investments - Government Grants and Loans

Application Summary Form

Date: 10/09/2012

ADDITIONAL INFORMATION PROVIDED BY THE APPLICANT

APPLICANT: Town of Burns

NAME OF PROJECT: SCADA Upgrade and New Location

PROJECT DESCRIPTION:

The Town of Burns is an Eastern Laramie County municipality of 301 residents.

With our 2011-2012 lagoon project grant (MRG-11232) complete, we have not expended \$23,299.86 of the funds that were allocated to that grant.

Our initial request at the time of original filing was that we be allowed to roll any excess over to our Liberty Park project, but since that request we have been approved for Sixth Penny funding that will cover the entire Liberty Park development.

Our new request for the excess funding is to allow us to spend the remaining dollars to upgrade and move our SCADA system from the Burns Community Center to the Burns-Plex which is now the home of our government offices. The SCADA system monitors sewer lift stations, the flume at the lagoon, wells, and water storage towers

Approval of this request will allow us to do an engineer recommended upgrade to our now obsolete SCADA system, which will include a new computer, antennas, chlorine analyzer, any other required associated equipment, and to install the upgraded system in the Burns-Plex.

As soon as we receive approval for the project, we will begin the procurement process. Design is not an issue because this will be a replacement of an obsolete computer and telemetry system with one with current technology. The construction process will be mostly non-weather-dependent, since the computer will be installed in an office in our government complex, and the field monitoring equipment is mostly under cover as well, so the project will be completed as soon as equipment can be assembled, gathered, and installed.

This will be the only funding for this project.
