SUBJECT: Purchase of Utility Rocket

Mr. Mayor

This is a request for a purchase order to buy the Utility Rocket. The Rocket is a secure and reliable high-speed mobile communications gateway, to provide CPD with the situational awareness they need on the frontlines. The Rocket is a secure broadband appliance that provides a universal communications platform for any police, fire, or EMS vehicle—leveraging one cellular data plan for all vehicle information communications needs. The Rocket seamlessly interfaces with the latest generation of GPS, RFID and on-board diagnostic and navigation mobile applications using hard-wired connections, or WPA2 wireless security with AES encryption. The system will eliminate the many communication dead spots that exist in the City and permit video data to be downloaded from the police car to the server by a wireless means at fast speeds. The system will track police vehicles by GPS on a map so that dispatchers know where each unit is, improving officer safety while improving response times.

We are requesting this be placed on the October 15, 2012 Finance Committee agenda to expedite the installation as this will coincide with the installation of the Arbitrator Camera System. This will reduce the cost of installation as they will be done at the same time.

The Utility Company is a sole source for the Rocket.

Thank you for your consideration on this matter.

Ted D. Miazga
Services Manager
Cheyenne Police Department
