The attached forms (Exhibits AA, A, B, C, F, H and Appendix 1) are to be reviewed and approved by you and/or your authorized representative. They describe the additional software and services you have requested along with the related fees.

**DATA FILE CONVERSION ASSISTANCE**

**New World** will provide conversion assistance to **Customer** to help convert the existing data files specified below. If additional files are identified after contract execution, estimates will be provided to **Customer** prior to **New World** beginning work on those newly identified files.

## General

1. A data conversion analysis and assessment to verify the scope of effort for the project will be conducted. A revised cost estimate for the data conversion may be provided at the conclusion of the assessment. Customer may elect to cancel or proceed with the conversion effort based on the revised estimate.
2. This conversion effort includes data coming from one unique database or source, not multiple sources.
3. No data cleansing, consolidation of records, or editing of data will be part of the data conversion effort. Any data cleansing, removal of duplicate records, or editing must take place by **Customer** prior to providing the data to **New World**.

## New World Responsibilities

1. **New World** will create and provide **Customer** with a conversion design document for signoff prior to beginning development work on the data conversion. No conversion programming by **New World** will commence until **Customer** approves this document.
2. **New World** will provide the data conversion programs to convert **Customers** data from a single data source to the **New World Licensed Standard Software** for the specified files that contain 500 or more records.
3. As provided in the approved project plan for conversions, **New World** will schedule on-site trips to **Customer** location in order to conduct the following:
  - a. Conversion Analysis
  - b. Assistance for Mapping and Testing
  - c. Conversion Go-Live Implementation and Support

**Customer** will be responsible for actual Travel Expenses for these trips.

4. **New World** will provide **Customer** up to four (4) test iterations of converted data. One test iteration consists of:
  - a. Running a conversion test in the **Customer's** test environment
  - b. **Customer** reviewing a conversion test and responding in writing to **New World** (see **Customer** responsibilities paragraph 3 below)
  - c. **New World** correcting or otherwise responding to issues to issues discovered and reported by **Customer**.
  - d. **New World** conducting internal testing to verify corrections
  - e. **New World** and **Customer** planning for the next test iteration and/or the live implementation.
5. **New World** will provide warranty coverage for any conversion-related issue reported by **Customer** to **New World** within 30 days after the conversion is run in the live database.

## Exhibit F / DATA FILE CONVERSION ASSISTANCE

### Customer Responsibilities

1. Data files from Customer's current AS400 database are included in this conversion.
2. **Customer** will respond to each test iteration in writing, on a form provided by **New World**, either:
  - a. Indicating acceptance that the Data Conversion Process is ready for the final conversion, or
  - b. Indicating a list of changes that need to be applied to the Data Conversion Process for the next test iteration.

Up to four (4) test iterations are provided as part of the Data Conversion Process. After the fourth (4<sup>th</sup>) test iteration, **Customer** shall pay \$2,500 for each additional test iteration. **Customer** will promptly review each test iteration when delivered by **New World**. Prompt **Customer** review will reduce the likelihood that a need for additional test iteration(s) may arise due to an extended delay between delivery of a test iteration and its review.

3. As provided in the project plan for conversions, **Customer** will provide a dedicated resource in each application area to focus on conversion mapping and testing. This includes dedicating a support person(s) whenever **New World** staff is on site regarding conversions. Roughly a one to one ratio exists for **Customer** commitment and the **New World** commitment. **Customer** understands that thorough and timely testing of the converted data by **Customer** personnel is a key part of a successful data conversion.
4. **Customer** agrees to promptly review and signoff on both the conversion design document, and on the final conversions after appropriate review.
